

```
package ifexample2;

import java.util.Scanner;

public class IfExample2 {

    public static void main(String[] args) {
        Scanner keyboard = new Scanner(System.in);
        double num1, num2;
        System.out.println("Enter a double value");
        num1 = keyboard.nextDouble();
        System.out.println("Enter a double value");
        num2 = keyboard.nextDouble();

        if (num1 < num2) { //This is valid for type double
            System.out.println("" + num1 + " is smaller than " + num2);
        }
        if (num1 == num2) { //This is not valid for type double, although it may work
            System.out.println("" + num1 + " is equal to " + num2);
        } else {
            System.out.println("" + num1 + " is NOT equal to " + num2);
        }

    }
}
```
