Section 1

User Documentation

This is the user documentation for our website application called IT Project Manager, we have created platform for professionals to be able to log in and have their project managed and outlined within the website. Our platform will ask you questions at the start up stage of the project ensuring that every aspect of the project is covered and providing additional features such as reminders, timelines, and evaluation schedule.

1. Login

The user must login with a valid email and password, no sign-up required since this is an open source when for users who do not necessarily have to fill in all their details.

2. Steps in creating a workspace

Step 1: Create your project name

Step 2: Specify or choose the number of collaborators

Step 3: Specify or choose the type of tools you will use to collaborate

3. Creating the workspace on the website

After creating your workspace you can now fully enjoy the benefits of having your project managed and outlined on our website.

4. Working with the tools provided

A user can choose a start and end date for their project on our calendar

A user may add more and remove collaborators

A user may add reminders and set weekly goals for their project

A user may cancel or terminate their project anytime.
