

Yes i would
to book table
for two

Good day sir can I assist
with anything

Host check the available
tale that two seat on the
system

waiter enters the table
order into the computer,
the order is sent to
thekitchen

A cartoon illustration of a chef in a white uniform and black hat standing in a kitchen. The chef is looking at a large black computer monitor on a counter. In the background, there are red-lit windows and a red emergency light. Two speech bubbles contain text about a system named zChef.

**zChef receives the order
on the screen and begin
preparing the meal**

**chef also alert waiter to
fetch the complete order**

waiter deliver order to
table ,order timer stop
and save
