

Faculty of informatics & Design, Department of Information Technology: SUMMARY OF WIL EXPERIENCE

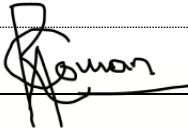

Week	FROM:	31 August 2021	TO	3 September 2021
Tues	Study Leave.			
Wed	I met with my team for our daily standup and discussed what we would be doing for today.			
	I picked up a bug logged by the testers and fixed it before going on to our Sprint Refinement session.			
	During the refinement, we discussed the tasks coming up for the next sprint and agreed to meet with our mentors to get a quick demo on how these features are implemented			
	After refinement, I met with a mentor for a code review and after he approved my code, I committed to the repository. Later, I went off on my own to try and learn some more about how Angular works in preparation for the work we'll be doing next sprint.			
Thurs	Today I met with my team for the daily standup and spoke about what we'd try and do.			
	We tried to help a team member resolve a bug that he picked up but after consulting our Product Owner, we found that the behaviour was expected and closed the bug.			
	Later we had a workshop with our mentor where he taught us about the history of the application we're working on and also the basics of Angular.			
	After this, we sat down together and played around with the code trying to see how everything works together.			
Fri	I met with my team for our daily standup and discussed what we would be doing for today.			
	After this we had a Sprint Retrospective where we spoke about what went well in the last sprint, what didn't go well and what we can improve on moving forward.			
	Later, we had a Sprint Review with all of the teams where I represented my team and spoke about our progress against our PI Plan			
	After this, I played around a bit more in the codebase to practice for next sprint.

Communication Skill				X		This week I got the chance to work on a bug by myself and I enjoyed being able to work alone and look forward to more opportunities like this.
Problem Solving Skills				X		My mentors were very helpful and taught me a lot this week.
Decision Making Skills				X		Looking through the codebase and understanding how some of the pieces work together is very enlightening and I look forward to working on Angular screens.

Technical Skills				X		Signature 

Faculty of informatics & Design, Department of Information Technology: SUMMARY OF WIL EXPERIENCE

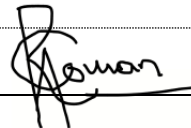

Week	FROM :	6 September 2021	TO	10 September 2021
Mon	We had a daily standup where we discussed what we'd be taking in for the day.			
	Following this, we had a Sprint Planning session where we agreed on what tasks we'd be pulling in for this sprint.			
	Later, we met with a mentor to continue our Angular workshop from last week.			
	In this session, with the help of my mentor, I also implemented user privileges for the feature we're working on and also implemented a search section.			
Tues	I worked on the tasks that had been assigned to me the day before and finished work on that before the daily standup.			
	After this, we had our daily standup and spoke about all the work we got done the day before and what we'd be working on today.			
	Following the standup, I met with a mentor for a code review and committed my work.			
	Later, I met with a teammate and tried to assist him with his development task that he picked up.			
Wed	I met with a team member to work on the task he picked up yesterday to try and resolve it.			
	After this, we had a daily standup where spoke about the work done yesterday and what we'd be doing today.			
	Later, we had a meeting with our Scrum Master where she taught us about naming conventions for our stories.			
	Following this, we met with a mentor where we finished up the task we were working on earlier and made some more minor improvements to our code.			
Thurs	Today we had a daily standup where we spoke about everything we managed to get done yesterday and what we'd be doing for the day.			
	After the standup I met with a teammate to sort out a bug we found in our code.			
	Later we tried to learn some more about integration tests on our own but didn't have much luck.			
Fri	Today I had a one on one with my manager to see how I'm handling everything and afterwards met with a mentor to help us get started on writing integration tests.			

	During the standup, it was decided that our time would be better spent on upskilling rather than writing integration tests so that was moved to the backlog and we created a story on our board for upskilling
	I picked up a bug that the testers found and tried to resolve the issue.
	After hitting several walls, I asked a mentor for assistance, and he helped me to sort out the bug.

Communication Skill					X	This week was very interesting because we ended up completing tasks much quicker than anticipated which left us looking for work to do while waiting on our testers to get back to us.
Problem Solving Skills				X		I learned a lot about Angular and how the various screens work.
Decision Making Skills				X		I look forward to doing more Angular work next week

Faculty of informatics & Design, Department of Information Technology: SUMMARY OF WIL EXPERIENCE

Week	FROM:	14 September 2021	TO	17 September 2021
Tues	Today we had a daily standup where we discussed what we did on Friday and what we'd be doing today.			
	Later, we had our Sprint Refinement where we refined our tasks for the coming sprint.			
	After this we had a meeting with one of our mentors to discuss how to do a task that's in our backlog.			
	Following this, we upskilled for the rest of the day on Angular development.			
Wed	Today we had a daily standup where we spoke about what we got done yesterday and what we'd be doing today.			
	I spent majority of the day upskilling myself in Angular development by watching courses.			
	Later in the day, the testers came back with a bug so we spent the rest of the afternoon trying to fix it.			
Thurs	Today we had a daily standup to discuss what we'd be doing for the day			
	I went off on my own to do some more upskilling and tried to take in as much information as I could			
	Later, we met with our testers to go over an issue they were experiencing and afterwards had a strategizing session for the upcoming Sprint Review/Demo.			
	Following this, I continued watching courses.			
Fri	Today we had a daily standup and spoke about what we managed to get done yesterday.			
	Following this, we had a Sprint Retrospective where we discussed how the past sprint went and what we could improve on.			
	Later, we all attended the Sprint Review with the other teams and my team members gave feedback on behalf of our team.			
	Afterwards, I spent more time upskilling.

Communication Skill					X	This sprint went by very quickly. After completing the dev work, we (the developers) didn't have much else to do but wait for the testers to complete their tasks.
Problem Solving Skills				X		It was then decided that we should upskill ourselves and I feel like I learned a lot.
Decision Making Skills				X		I now know more about Angular than I did before I started watching this course and I know this will only benefit me moving forward.
Teamwork Skills					X	I will continue watching this course until I complete it so that I can obtain as much knowledge as I possibly can from it

Faculty of informatics & Design, Department of Information Technology: SUMMARY OF WIL EXPERIENCE

Week	FROM:	21 September 2021	TO	24 September 2021
Tues	Today, before the standup, I started to work on implementing the DELETE functionality on the screen we've been working on.			
	After this, I had a standup where we discussed what we did last week. Following this we had a Sprint Planning session where we planned out what we'd be doing during this sprint.			
	Later, after finishing my implementation, I met with a mentor for a code review. After this I met with the testers for a review with them and also met with my Product Owner (PO) for an analyst review.			
	In the review with my PO, she found one minor issue and I spent the rest of the day working on that.			
Wed	Today I got to work on the issue I was dealing with yesterday and ended up meeting with a mentor briefly to get some assistance.			
	After this, I had a standup where we spoke about what we did yesterday and what we'd do today.			
	After the standup, I struggled a bit more with this issue and eventually spoke to a mentor who told me that what I did was in fact correct and so I committed my work to the repository.			
	Later, I tried to do some more upskilling by continuing to do the course I've been watching.			
Thurs	I met with my testers and one of our mentors to discuss an issue the testers were having.			
	After this we had a standup where we spoke about what we'd be doing for the day.			
	For the rest of the day I just continued upskilling.			
Fri	Public holiday.

Communication Skill					X	I am getting better at programming in Angular and understanding how to be a better developer.
Problem Solving Skills				X		I have also learned a lot from all the upskilling I had to do.
