

WORK-INTEGRATED LEARNING

SIMULATED (SIM) OFFICE

PROJECT BRIEF

VERSION 1.0

27/02/2022

PURPOSE AND OVERVIEW OF THE SIM OFFICE

This project brief gives the direction and scope of the project and forms the contract between the SIM Office Project Teams and the SIM Office Manager. CPUT's VISION 2030 is anchored in "ONE SMART CPUT" which incorporates 'oneness' and 'smartness' as key dimensions supporting the smart university concept. The purpose of the SIM Office is to develop "smart" IT solutions for the CPUT community.

BACKGROUND TO THE PROPOSED WORK

Employability skills are essential for interns to meet the needs of the industry. In addition, these skills are the gap between education and the world of work (Suarta, Suwintana, Fajar Pranidi Sudhana, and Hariyanti: 2017). Many studies have been undertaken by scholars and researchers in identifying employability skills that ICT interns should possess for the purposes of employability. Studies in employability skills were undertaken in various countries, such as America, Australia, Bangkok, Indonesia, Malaysia, South Africa, and the United Kingdom. The following common employability skills were extracted from these studies for the purposes of this study: communications skills; decision-making skills; problem-solving skills; teamwork and technical skills.

The SIM Office was established to assist students to develop employability skills that will improve their likelihood of being placed in the ICT industry.

OBJECTIVES

The deliverables of the SIM Office are:

- *Record and reflect on the development of employability skills in logbooks.*
- *Showcase evidence of employability skills using Blackboard Portfolio.*
- *Understand business etiquette through the engagement with project sponsors*
- *Demonstrate business writing skills that include compiling agenda, minutes, and technical reports*

SCOPE

There SIM Office teams are provided with a variety of projects to work on. These include:

- *The Bursary Management project for CPUT's Advancement Department. This project will be developed in SharePoint. The teams will use the SRS document to design user interfaces for the system.*
- *The Tabeisa Start-up Café Website for CPUT's Service-Learning Unit. This project will be developed in SharePoint. The teams will use the SRS document to design user interfaces for the website.*
- *The set-up of the Juniper/Cisco/Huawei for CPUT's IT Department.*
- *Website design for Kamikaze Innovations.*

DELIVERABLES

Deliverable title	Deliverable description
<i>Logbooks</i>	<i>The team members will complete individual logbooks and submit the logbooks on Blackboard.</i>
<i>Portfolio of Evidence</i>	<i>Each team member will showcase evidence of employability skills in their individual Blackboard Portfolio.</i>
<i>Agenda</i>	<i>Team members within each team will collaboratively create an agenda for each team meeting.</i>
<i>Minutes</i>	<i>Minutes of the meetings will be compiled to record the participation of each team member in the project.</i>
<i>Project Artifact</i>	<i>This is dependent on the project selected:</i> • <i>SharePoint website user interfaces.</i> • <i>Lab set-up</i> • <i>Website development</i>

SIM OFFICE PROJECT TEAMS

The SIM Office members are tasked to:

- *Create a team of six members.*
 - *Create a team name.*
 - *Define team members' roles and responsibilities.*
 - *Select a project.*
 - *Set up meetings and agendas.*
 - *Participate in meetings and draft meeting minutes.*
-
