

WORK INTEGRATED LEARNING (WIL) PROGRAMME (CHUMA NXAZONKE: 219181187)

NAME OF COMPANY/PROJECT:						
WEEK	FROM	2 nd August 2022			TO	5 th August 2022
TUES						
WED						
THUR	Yesterday I had a meeting with our lecturer, giving us the introduction on the project that we are going to do during this period, giving us a way forward on the WILL project how we will be going ahead with the clients and how things will work out. In other words, telling us what is expected from us. We also go feedback on certain tasks that are coming up.					
FRI	Today I had another meeting but with the client where I gather the system requirement and the business rules of the system we are going to implement. In her explanation she said the current system a Graduate send a CV via Graduate. Recruitment Portal email address that she then saves in a folder. The CV can be sent by a Graduate in any format that Ms. B Abrahams then must convert manual in a PDF format to send to companies. She also she also explained that she must use excel as a database to send CVs to companies. The Graduate also receives acknowledgement email for CV sent. Mrs Prima also stated that we as students must have our logbooks today (5 th August 2022) so that they can be signed by the client. Mrs. Prima also mentioned that we as students must make a transcript that contains the requirements and functions of the system. Mrs. Prima also mentioned that the data flow diagram is for next week Friday (12 th August).					

MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS	
	1	2	3	4	5		
COMMUNICATION SKILLS					X	COMMUNICATION SKILLS	Where I had no clarity I managed to ask questions. In both meeting with client and our project supervisor I asked questions where I didn't understand. That where I noticed that my communication skills are better, they are improving because I was able to deliver clear message and explanation.
PROBLEM SOLVING SKILLS					X	PROBLEM SOLVING SKILLS	In terms of problem-solving abilities, while ma'am was explaining the current system that she is currently using, I noticed that a large influx of data (CV) via email is not feasible. I've seen problems that can be fixed, such as using a database to sort data into categories and saving the registration progress on WordPress.
DECISION MAKING SKILLS					X	DECISION MAKING SKILLS	For Decision-making skills, Today I decided to participate and ask the client questions which I thought will get us more insight on what we will be working on. While I was gathering the system requirements, I decided on the crucial part of the system that it will be beneficial that implement a database and create an automation message for a successful or failed message to the student.
TEAMWORK SKILLS					X	TEAMWORK SKILLS	My teamwork skills were average as I we have only been communicating on ensuing that the group processes have been decided on and sorting out some admin work. I plan to improve this as the project progresses and more work is provided for the team to work on.
TECHNICAL SKILLS				X		TECHNICAL SKILLS	The technical skills I have presented this week are the use of Ms Team views. I plan to use more software as I work on my Project Plan and data flow diagram.

WORK INTEGRATED LEARNING (WIL) PROGRAMME (CHUMA NXAZONKE: 219181187)

NAME OF COMPANY/PROJECT:		GRADUATE RECRUITMENT PORTAL					
WEEK	FROM	9 August 2022			TO	12 August 2022	
TUES	Here during the day, I was busy finding out how to elaborate a professional transcript. Wanted to firstly know the main reason of the transcript and what it serves for. During the evening, after searching how to elaborate the transcript, then I have started with the previous session we had with the client of the project, and I managed to finish it.						
WED	Today I was busy with my project plan today for the Graduate Recruitment portal project, I was having difficulty with the excel spreadsheet on where the project plan must be developed. I'm almost done the project plan at this point.						
THUR	Today I woke up and I did some research and learnt what a flow diagram is and what is the purpose of it. I did this so I could implement a desired outcome for the deliverables for the project I'm involved in.						
FRI	Today We were supposed to have a meeting with our client, but the meeting never happened, apparently our client is on leave so the meeting had to be postponed to next week. I decided to work on my task (Data Flow Diagram) that I've been assigned to and I did so.						
MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS	
	1	2	3	4	5		
COMMUNICATION SKILLS				X		COMMUNICATION SKILLS	Communication was largely done in the graduate recruitment WhatsApp group, where I raised questions about topics that raised unsurety amongst the group members.
PROBLEM SOLVING SKILLS					X	PROBLEM SOLVING SKILLS	For problem-solving skills, I have identified the issues in the current system, and I have researched and applied my solution to the specific problem.
DECISION MAKING SKILLS					X	DECISION MAKING SKILLS	Decisions made during the current part of the project was answered mostly in last week's meeting, this reduced our involvement in decisions for the week and enquiries was raised in the group to get input and help make better decisions.
TEAMWORK SKILLS				X		TEAMWORK SKILLS	Having a part time job where I work within a team has assisted me with the proper skills to communicate and help others within my team.
TECHNICAL SKILLS				X		TECHNICAL SKILLS	We had to create a data flow diagram for the project, I created mine using Wondershare EdrawMax which has the functionality to do so. I then applied what I learned when I was researching the system online.

NAME OF COMPANY/PROJECT:		GRADUATE RECRUITMENT PORTAL				
WEEK	FROM	16 August 2022			TO	19 August 2022
TUES	Today I was very productive because I managed to complete my project plan and data flow diagram for the graduate recruitment portal. After completion, I have submitted the data flow diagram on MS Teams.					
WED	On this day, I had a meeting with my team members to discuss the project plan and data flow diagram. Then we took a decision to vote for the one that we thought it will present the manual process for our system as requested.					
THUR	Started with an online course on Udemy - Professional Java Developer Career Starter: Java Foundations					
FRI	Today we had a meeting with the client where we presented the data flow diagram, and we received feedback from the client. We had to make the changes as requested by the client and we changed some few things on the DFD accordingly.					

MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement 1	Inconsistent 2	Marginal 3	Competent 4	Excellent 5	EMPLOYABILITY SKILLS	
COMMUNICATION SKILLS					X	COMMUNICATION SKILLS	During the duration I feel my communication skills were excellent as I raised my opinions on matters and asked questions to ensure clarity throughout the meeting. I have improved my communication skills because I was able to assist my team members and answer their questions during the meeting.
PROBLEM SOLVING SKILLS					X	PROBLEM SOLVING SKILLS	For problem-solving skills, our project plan for the group was incorrect, then I took the liberty to fix it with the approval of the group.
DECISION MAKING SKILLS			X			DECISION MAKING SKILLS	As group we all come to a decision on which diagram to present to the client which I contributed my input on the decision.
TEAMWORK SKILLS				X		TEAMWORK SKILLS	I was impressed to be helping my team members with some issues and myself being helped from them. We managed to deliver the data flow diagram to our client which is very important when you are working as a team.
TECHNICAL SKILLS				X		TECHNICAL SKILLS	For technical skills, I have used google meets (for our meeting), Lucid charts (Data flow diagram), WhatsApp (Voting the best data flow diagram) and excel (to produce the project plan).

WORK INTEGRATED LEARNING (WIL) PROGRAMME (Marvin Hope – 219445842)

NAME OF COMPANY/PROJECT:		Graduate Recruitment Portal					
WEEK	FROM	23 August 2022			TO	26 August 2022	
TUES	Today I conducted some research on the different levels of the data flow diagram we had to construct for the graduate recruitment portal. I discovered that the different levels illustrate different implementations and complexity levels. I also learnt how to use Figma to construct my DFD and implemented the desired outcome for the portal.						
WED	Moving on, I progressed to level 1 of the DFD which notates each of the main sub-processes that together form the complete system. I start off with a login module which demonstrates cycle Or the process of signing into the system and the process of validating data stored in the database.						
THUR	Group meeting on google meeting each group showed their diagram and vote on which diagram best suited the requested work. Defined new responsibility on the group.						
FRI	We meet with Ms. Abrahams which is our client and we have represented our data-flow diagram and re-explained it. The client was satisfied but also the client mentioned some adjustment that need to take place from our data-flow diagram.

	1	2	3	4	5		
COMMUNICATION SKILLS				X		COMMUNICATION SKILLS	Was able to communicate during the online meeting to discuss the new dataflow diagram for the new system.
PROBLEM SOLVING SKILLS					X	PROBLEM SOLVING SKILLS	I came up with ideas when we were developing the data-flow diagram in our group of four members. The ideas were about how to out-line the different level of data-flow diagram.
DECISION MAKING SKILLS				X		DECISION MAKING SKILLS	As group, we decided together what data flow diagram to present and what the automated system for graduate recruitment will be.
TEAMWORK SKILLS			X			TEAMWORK SKILLS	Team is good even though not everyone participates in the team, but those who Take part contribute and work with the team.
TECHNICAL SKILLS				X		TECHNICAL SKILLS	I used my technical skills to come up an automated system by using tools and theory of what I learned in my course
