COMMUNICATION SKILLS				X		COMMUNICATION SKILLS	During the duration I feel my communication skills were excellent as I raised my opinions on matters and asked questions to ensure clarity throughout the meeting. I plan to communicate more as the project continues and raise my opinion in the times that it is most crucial.
PROBLEM SOLVING SKILLS				X		PROBLEM SOLVING SKILLS	I have begun to work on the project plan and data flow diagram. I feel that my problem-solving skills have mildly been put to the test as I am unfamiliar with data flow diagrams. As the task progresses, I will be given more tasks which will test my problem-solving skills more. As of now I feel my problem-solving skills are on par and not much improvement can be done at this point in time.
DECISION MAKING SKILLS			X			DECISION MAKING SKILLS	There weren't many decisions required of me except whether to join the meetings or not, so I feel that my decision-making skills up to this point were wise and valid. As the project progresses and more work is allocated to me, I plan on making more decisions which will have a larger impact on the work which will be completed.
TEAMWORK SKILLS			X			TEAMWORK SKILLS	My teamwork skills were average as I we have only been communicating on ensuing that the group processes have been decided on and sorting out some admin work. I plan to improve this as the project progresses and more work is provided for the team to work on.
TECHNICAL SKILLS			X			TECHNICAL SKILLS	The technical skills I have presented this week are the use of Team views. I plan to use more software as I work on my Project Plan and data flow diagram.
