

WORK INTEGRATED LEARNING (WIL) PROGRAMME

NAME OF COMPANY/PROJECT:		GRADUATE RECRUITMENT PORTAL				
WEEK	FROM	October 11, 2022			TO	October 14, 2022
TUES	After our discussion we had in our class yesterday about the way forward I decided to attack this week's deliverable asap.					
	So, myself and my group had a meeting about this week's deliverable talking about what we will do and how things need to according to our wire frame deliverable that we did the week before.					
	We decided that we should divide the work and I chose to do the home page and the job application page.					
WED	With each one of us having our tasks to do I started with the design on a piece of paper before I took it to a new software that I've never used before know as Figma					
	Using Figma was hard because this is the first time, I was using this software and it was a struggle but you tube became my friend and it help so much because it showed me the basics of the software.					
	After finding the basics I finished my design and sent it in our group where our work was merged and setup for tomorrows discord meeting.					
THUR	Started the morning with our discord meeting with all the teams.					
	We presented our piece of work to the team and we discussed where we can make improvements and visa versa we decided on one groups user interface and we all agreed on that specific one to present too the client tomorrow.					
FRI	Our client returned from her leave and we presented to her our user interface to her and what we came up with.					
	We received constructive criticism from our client tell us what more we need to add and how things need to be because we had a good user interface but with quite a few things missing from our design that has to be on the user interface so that the Grad portal receives al the relevant documents and personal information					

MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS	
	1	2	3	4	5		
COMMUNICATION SKILLS						COMMUNICATION SKILLS	This week was a very good what because a lot of my opinions in our meeting was taking into consideration and the design was similar to my presentation.
PROBLEM SOLVING SKILLS						PROBLEM SOLVING SKILLS	Using YouTube this week really solved a lot because I was struggling and it solved my problem of not being about to use the new software.
DECISION MAKING SKILLS						DECISION MAKING SKILLS	Deciding on a design of this week's deliverable was easy one because we decided to Go with the design on our wireframe deliverable from week before.
TEAMWORK SKILLS						TEAMWORK SKILLS	As a group our team work was very good and especially mine with my team all of us Coming up with different designs and merging our work as a team helped a lot.
TECHNICAL SKILLS						TECHNICAL SKILLS	Technical skills were at a high because we had to get familiar with a new software I've never heard of or used before and I got a hold of it after one YouTube video
