

WORK INTEGRATED LEARNING (WIL) PROGRAMME

NAME OF COMPANY/PROJECT:		Graduate Recruitment Portal						
WEEK	FROM	11 October 2022				TO	14 October 2022	
TUES	This week I had to design user interfaces for the graduate recruitment portal. The user interfaces were based on the wireframes however I can adjust them.							
	Since there’s always confusion around wireframes and user interfaces, followed my usual strategy to do research on the two and see the difference and how to implement it.							
	Throughout the day I made progress on understanding the difference between the two and decided to do some examples of it.							
WED	Research from yesterday helped me understand how to approach the user interfaces for the recruitment portal. In each of these examples, they used Figma to design id on. So, after understanding the idea behind my task I attempted it on Figma							
	I found examples of my tasks and used them as guidance. Each of these templates was different but was based on the current system we are designing.							
	I designed a set of 3 user interfaces the same as last week just more user-friendly and including more details.							
THUR	In the morning I and the group had a session to check up on each of our progress and since I was ahead of the rest of the group, I assisted them with tutorials on how to implement user interfaces.							
	Later that day we had another google meeting to merge the progress of each member and again make sure that we each included what we needed to do.							
	I made a document to put all the work in using the appropriate font and styles to customize our document and shared the document in our group chat.							
FRI	Mr. Mbuso presented the documents we formed yesterday to our client and made sure that the client understood our approach. The client did ask several questions which we expected. From the question also came suggestions and we made notes to ensure that we fix these problems and included them in the following week’s task.							
	We concluded the session and we all agreed that we will present the user interfaces again next week with the necessary changes to the document.							
	Later that day continued with my notes on this week’s meetings and filled in my logbook.							
MENTOR EVALUATION		RATINGS (tick the relevant box)				STUDENT REFLECTION		
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS		
	1	2	3	4	5			
COMMUNICATION SKILLS						COMMUNICATION SKILLS	The approach this week was similar to previous weeks communicated through WhatsApp and team meetings with my group	
							Furthermore, interacted with the other groups to solve problems.	
PROBLEM SOLVING SKILLS						PROBLEM SOLVING SKILLS	The task this week was something we a little tricky when I encountered problems ,	
							I used YouTube and online resources to overcome the problem	
DECISION MAKING SKILLS						DECISION MAKING SKILLS	We decided to have two sessions decided the present the user interfaces again next with the necessary changes	
TEAMWORK SKILLS						TEAMWORK SKILLS	Assisted team members that were in need and ensured that we completed the task. Made the google meeting to share our progress over	
						TECHNICAL	To design the user interfaces, I used Figma	

WORK INTEGRATED LEARNING (WIL) PROGRAMME

TECHNICAL SKILLS						SKILLS	Held meetings on discord and google meet and sh our presentation through discord
