

WORK INTEGRATED LEARNING (WIL) PROGRAMME (GRADUATE RECRUITMENT PORTAL)

NAME OF COMPANY/PROJECT:						
WEEK	FROM	[03/10/2022]			TO	[07/10/2022]
TUES	Today I did research on the next deliverable that is to be presented to the client. I conducted research on the next deliverable which is the wireframes design and its designated requirements. I discovered the requirements for the wireframes design and the different screens to include in the design.					
WED	Today I met with my sub-group to compile and design the wireframes design screens and document. I created a cloud space on balsamiq where we could all collaborate and complete our allocated tasks. In the meeting we split the tasks and each individual had a task to complete.					
THUR	Today in the morning I met with my sub-group to discuss the wireframes we completed and what needed to be changed and adjusted. It so happened that the group was happy with every individual's contribution. Later on in the morning we met as the mass group and each group presented their wireframes to the group.					
FRI	Today we met with the client and we presented the Business Rules and ERD again before presenting the wireframes. We then presented the wireframes and the wireframes presented were the wireframes my group completed. The client was happy but had a few concerns about company interaction and involvement with the system.					

MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS	
	1	2	3	4	5		
COMMUNICATION SKILLS						COMMUNICATION SKILLS	I was able to pull off communication on multiples streams of platforms this week. I was a bit unsure about the wireframes design style and I was vocal enough to ask the group if we needed to adhere to a specific design style for the wireframes. I passed on the information I received to my sub-group in the meeting we had on Wednesday to be transparent so that we could all be on the same page. I was also able to send the minutes of the meetings we had as a group on the discord server we have.
PROBLEM SOLVING SKILLS						PROBLEM SOLVING SKILLS	This week we ran into a problem of not being able to get a platform where we could all collaborate on a unified space to create our sub-groups wireframes. I managed to solve this problem by finding a platform called balsamiq which was a free designing platform and was free for teams to collaborate and work as one on the same project.
DECISION MAKING SKILLS						DECISION MAKING SKILLS	As the sub-groups elected leader I was able to decide on the days and times we would meet as a group. I also helped decided on which individual would be taking on the different screens to develop as part of their wireframes tasks. The group was also happy with fact that I changed our meetings to teams because it was much easier and more convenient.
TEAMWORK SKILLS						TEAMWORK SKILLS	With teamwork this week I was able to attend all team meetings. I also completed all my tasks my group required me to do before the scheduled timeframe. I contributed to the team by also compiling the final document of wireframes we would present to the meeting of the mass group. It was a bit of a challenge but all went well.
TECHNICAL SKILLS						TECHNICAL SKILLS	This week I used multiple streams of technology. To start of with, I used balsamiq which is a totally new platform I have never used and it was a bit of struggle to use but I was able to get the hang of it at the end and develop my wireframe screens. I also used teams for meeting which is not something new but I learned new features when I was presenting to my sub-group on teams. I also used discord to upload group minutes of meetings conducted.
