

NAME OF COMPANY/PROJECT:						
WEEK	FROM	11/10/2022			TO	13/10/22
TUES						
	We as group B decided to task each member with different UI design pages for our Grad Recruitment system, I was specifically tasked to design the Login and Registration page which was part of the wireframe we presented last week					
WED	I searched online to check different templates and how to make my pages look and feel easy on the user's eye. I continued to search for different or mostly used resources to create this UI design and I found out about Figma which I struggled to use at first use this led me to watch YouTube videos to enhance my skills and I finally got a hang of it, and I created my pages.					
	I did the final touches on my pages as we were supposed to meet up with my group to present the work we have already done on our pages. My page included three different sections the first one had the login page for both the user and the admin, and it also had buttons that allow the user to create an account to log in and a Registration page that allowed the user to create their profile for the website					
	We met up with Group B to discuss our findings only to find out one member was struggling, and we did by all means to help the member which led to him creating his page successful					
THUR	We had a problem of who was going to present as all members were not available and I decided to present as the other members combined all our findings					
	We met on discord with the other members of the group to present our work so we can present on Friday					
FRI	I presented as promised and the other group members had questions about our work, I successfully answered					
FRI	We met up with Mrs. Prima to present our UI design and she told us to fix some few errors					
MENTOR EVALUATION		RATINGS (tick the relevant box)				STUDENT REFLECTION
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS
