MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS	
	1	2	3	4	5		
COMMUNICATION SKILLS						COMMUNICATION SKILLS	Worked on the ADP3 capstone this week. My task was to work both front and backend of the web-based application we did. I frequently communicated during group meetings as we all discussed group progress. With suggestions I was able to add, it helped my project team's work progressed.
PROBLEM SOLVING SKILLS						PROBLEM SOLVING SKILLS	Our web capstone project didn't work for a while, due to broken code. My task was to help detecting the "bug" within the program to make the project work again. How I helped solving the problem was to do some research on Stackoverflow and YouTube. With these mentioned sources, it helped with solving our problem eventually.
DECISION MAKING SKILLS						DECISION MAKING SKILLS	We had a meeting to decide who will present which pages. Each one's task (including me) was to decide which page(s) they want to present. I then looked for pages I can present the next day for the ADP3 project presentation. I was then able to confirm on which pages I will present the following day.
TEAMWORK SKILLS						TEAMWORK SKILLS	We all had to hand in our tasks in time and send it over GitHub. My task was to complete the client page registration form as well as test cases I then used various sources such as YouTube and Google, to help me complete my assigned task. This helped me complete my task on time and hand it in to group lead.
TECHNICAL SKILLS						TECHNICAL SKILLS	I had to use Visual Studio code (front-end) and IntelliJ (Back-end). The task was to design the client and server-side code by making use of these mentioned tools. To complete the tasks, I had to code within Visual Studio and IntelliJ. With the code I implemented I was able to make my pages to be functional.
