

Assessment Four (4): The Research Poster

Research Methods for IT Professionals

REM474S, REM475S, RME477S

DUE DATE: 16 October 2020 (10%)

Produce a **Research Poster** that describes and outlines the empirical research project you are busy undertaking. The poster should describe your research-in-progress and display the progress you have made to date. You are required to work in pairs.

Technical Requirements

- Describe and report all the research activities you have completed to date i.e. what is contained in your draft research report submitted on 2 Oct 2020
- If you have already collected data, you CAN describe/display your preliminary findings
- **Proposed content sections**
 - Title
 - Abstract
 - Introduction/Overview
 - Methods
 - Findings/Discussion
 - References
- You can use any software to design and produce your poster, HOWEVER, you must upload the final file in **JPEG format** on Blackboard
- Only one student must upload the completed file (results/feedback via Blackboard will be provided to the student who uploaded the file)
- Use the design guidelines offered below to inform the size and design of your poster. You DO NOT need to produce a print version of the poster – only a digital copy in JPEG format

Assessment Criteria

- Design and presentation of poster (layout, style and readability, attention to detail, professional presentation)
- Comprehensive reporting/description of research project (levels of detail, quality of description, use of suitable terminology, clarity of description and language use)
- Referencing (adherence to Harvard methods, attention to detail and accuracy of citations)
