

RESEARCH ACTIVITIES

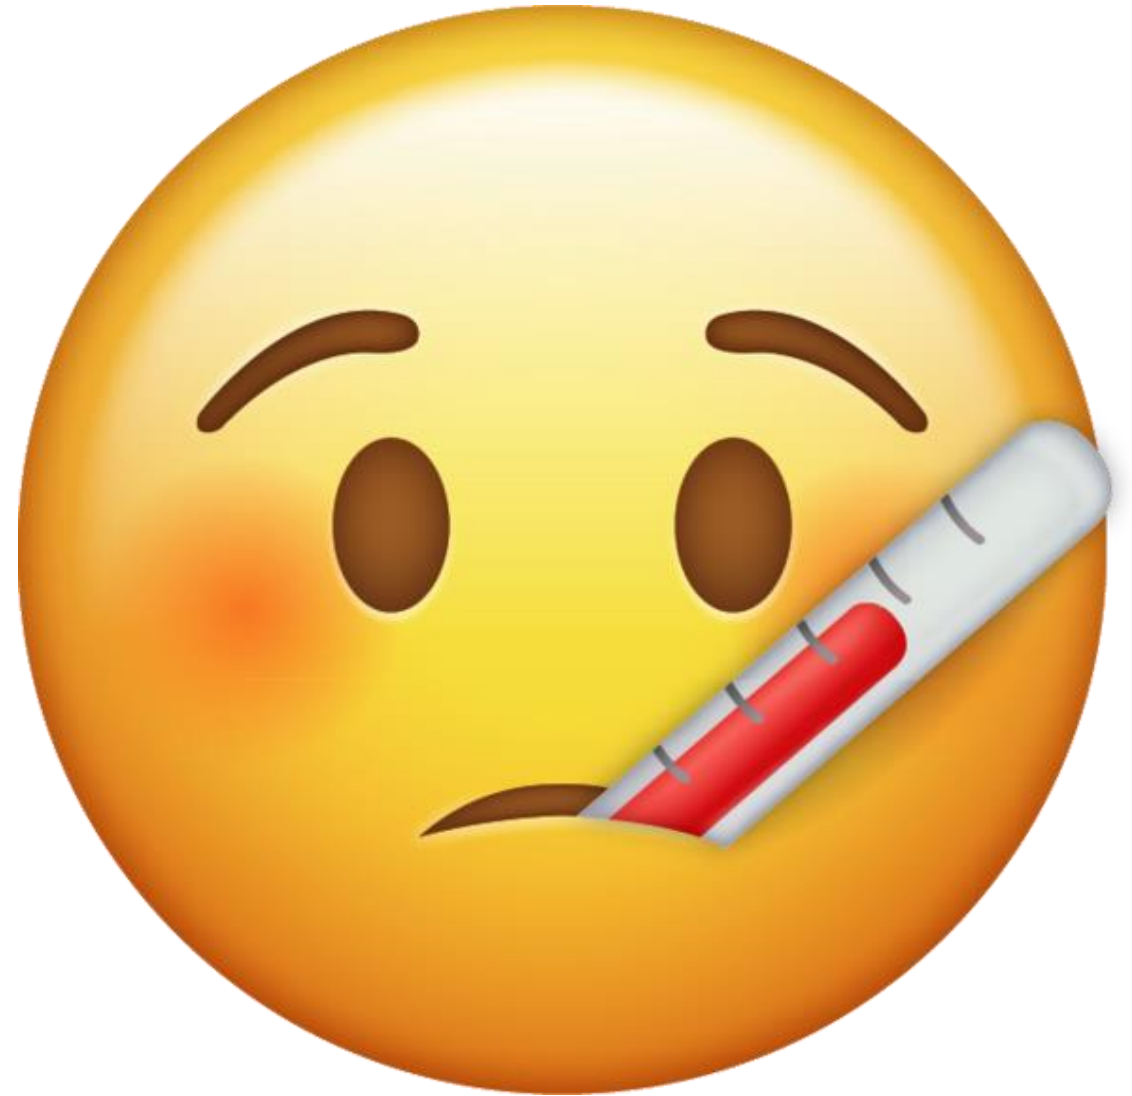

Research Methodology for IT
Professionals

Lecture 4 – 24 Feb 2020

Lynn Coleman

TEMPERATURE CHECK

- Divide a sheet of paper into two
- On one side comment on what is **working well for you?**
- On the other side of the paper – list **what is not working for you**. Also write down what concepts, terms, ideas, theories you **DON'T understand**

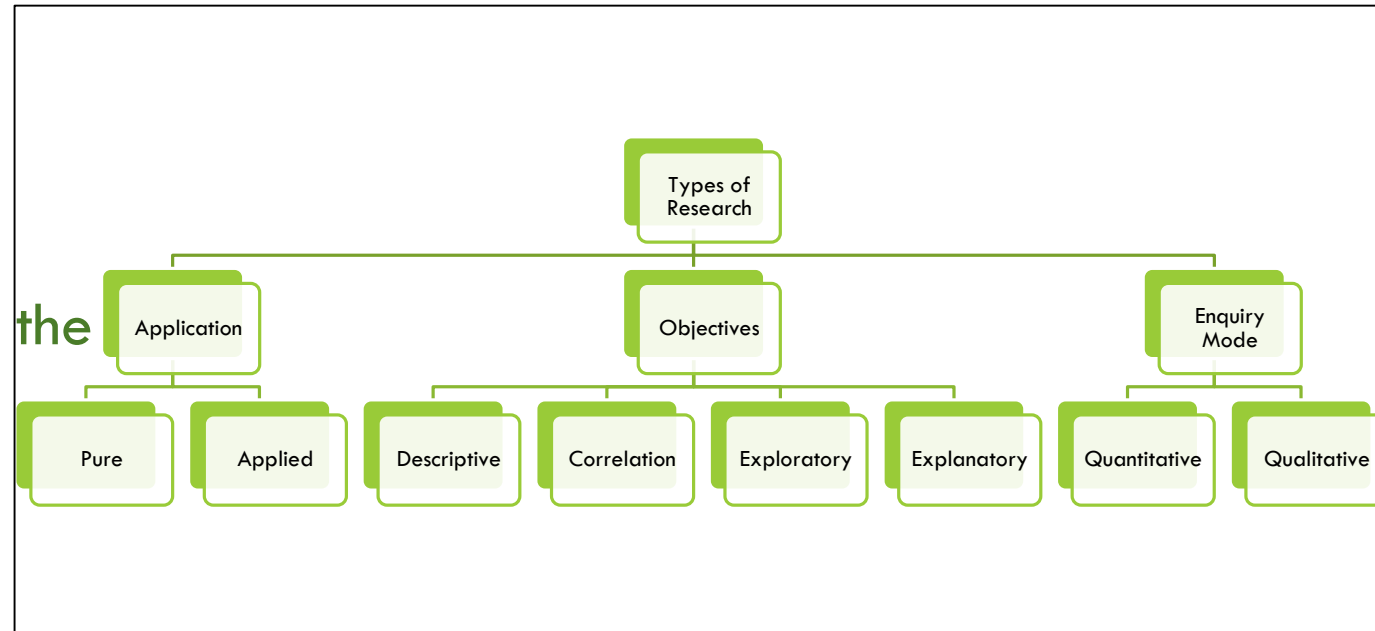

HOUSEKEEPING

- class arrangements
- venue
- register
- weekly tasks vs lesson plans vs subject guide
- protocol when sending emails
- communications via Blackboard

ACTIVITY ONE — RESEARCH TOPIC/PROBLEM

- Working in small groups
- Present your research topic/problem to the rest of the group
- Provide reasons why you are interested in this topic
- Use the classification schema proposed by Kumar (see below) to explain your proposed research interest/study
- Group members are meant to
 - Ask questions for clarity
 - Comment on the positives
 - Make suggestions on how to improve the descriptions provided

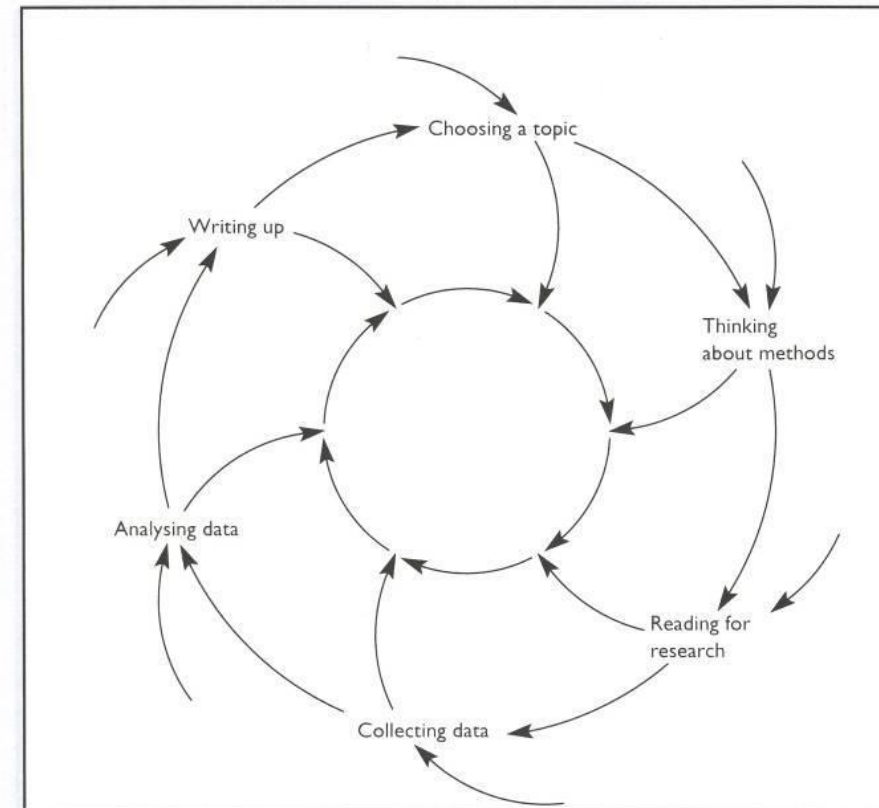

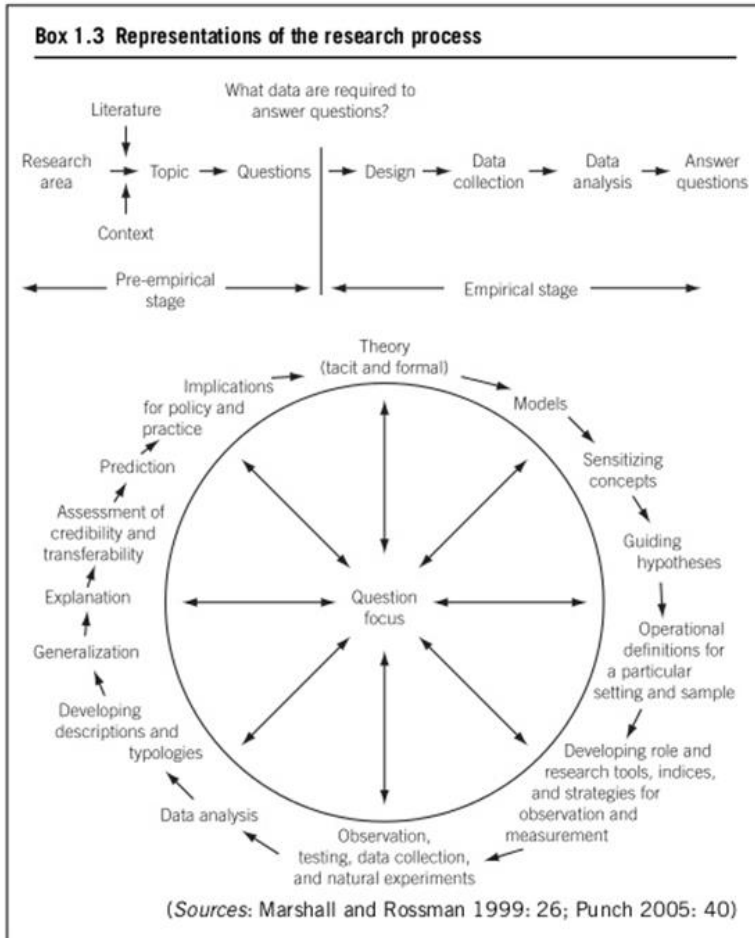

THE RESEARCH PROCESS

- what does it actually mean to 'do' research
- RESEARCH PROCESS
 - general actions or steps researcher undertake when completing a research study
 - outlines what activities should be undertaken from start to end-point of a research study
 - general process, able to accommodate variations and different approaches to types of research undertaken
 - map to guide activities
- What is important
 - Advice from
 - Blaxter et al
 - Kumar

THE RESEARCH PROCESS - REPRESENTATIONS

Blaxter et al, 2006: 8-9

THE RESEARCH PROCESS - REPRESENTATIONS

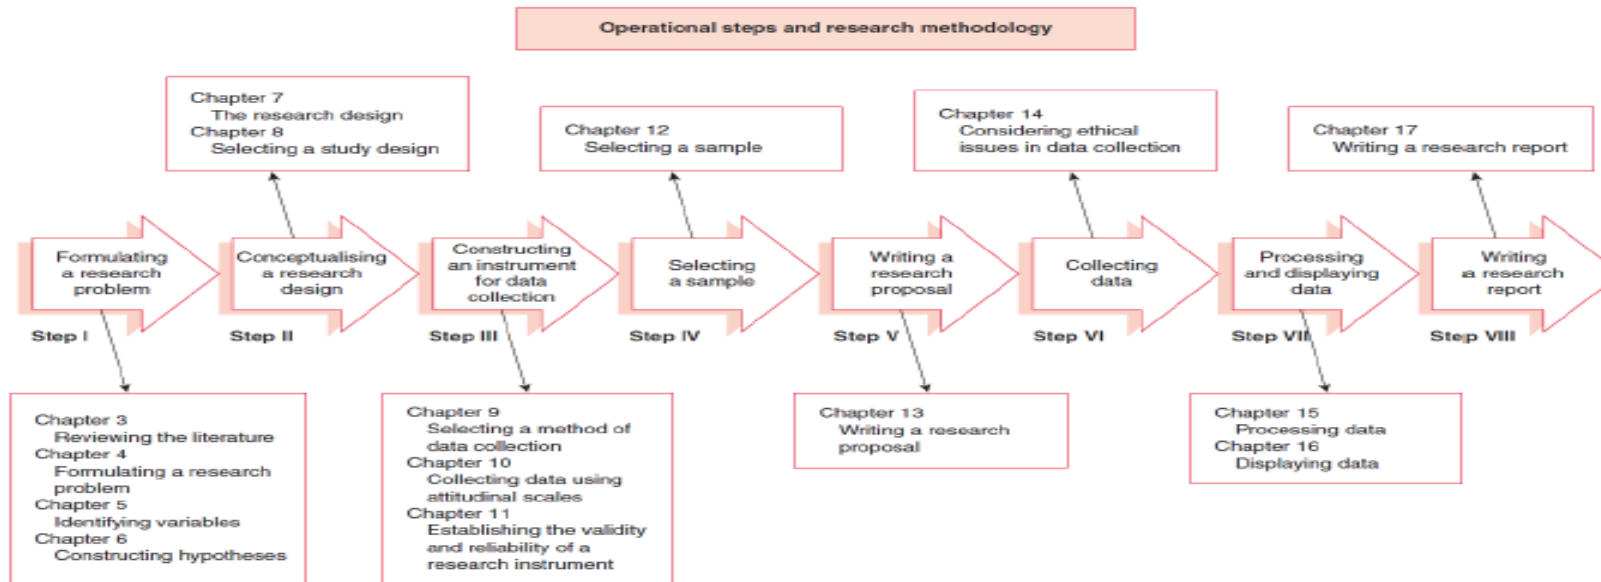

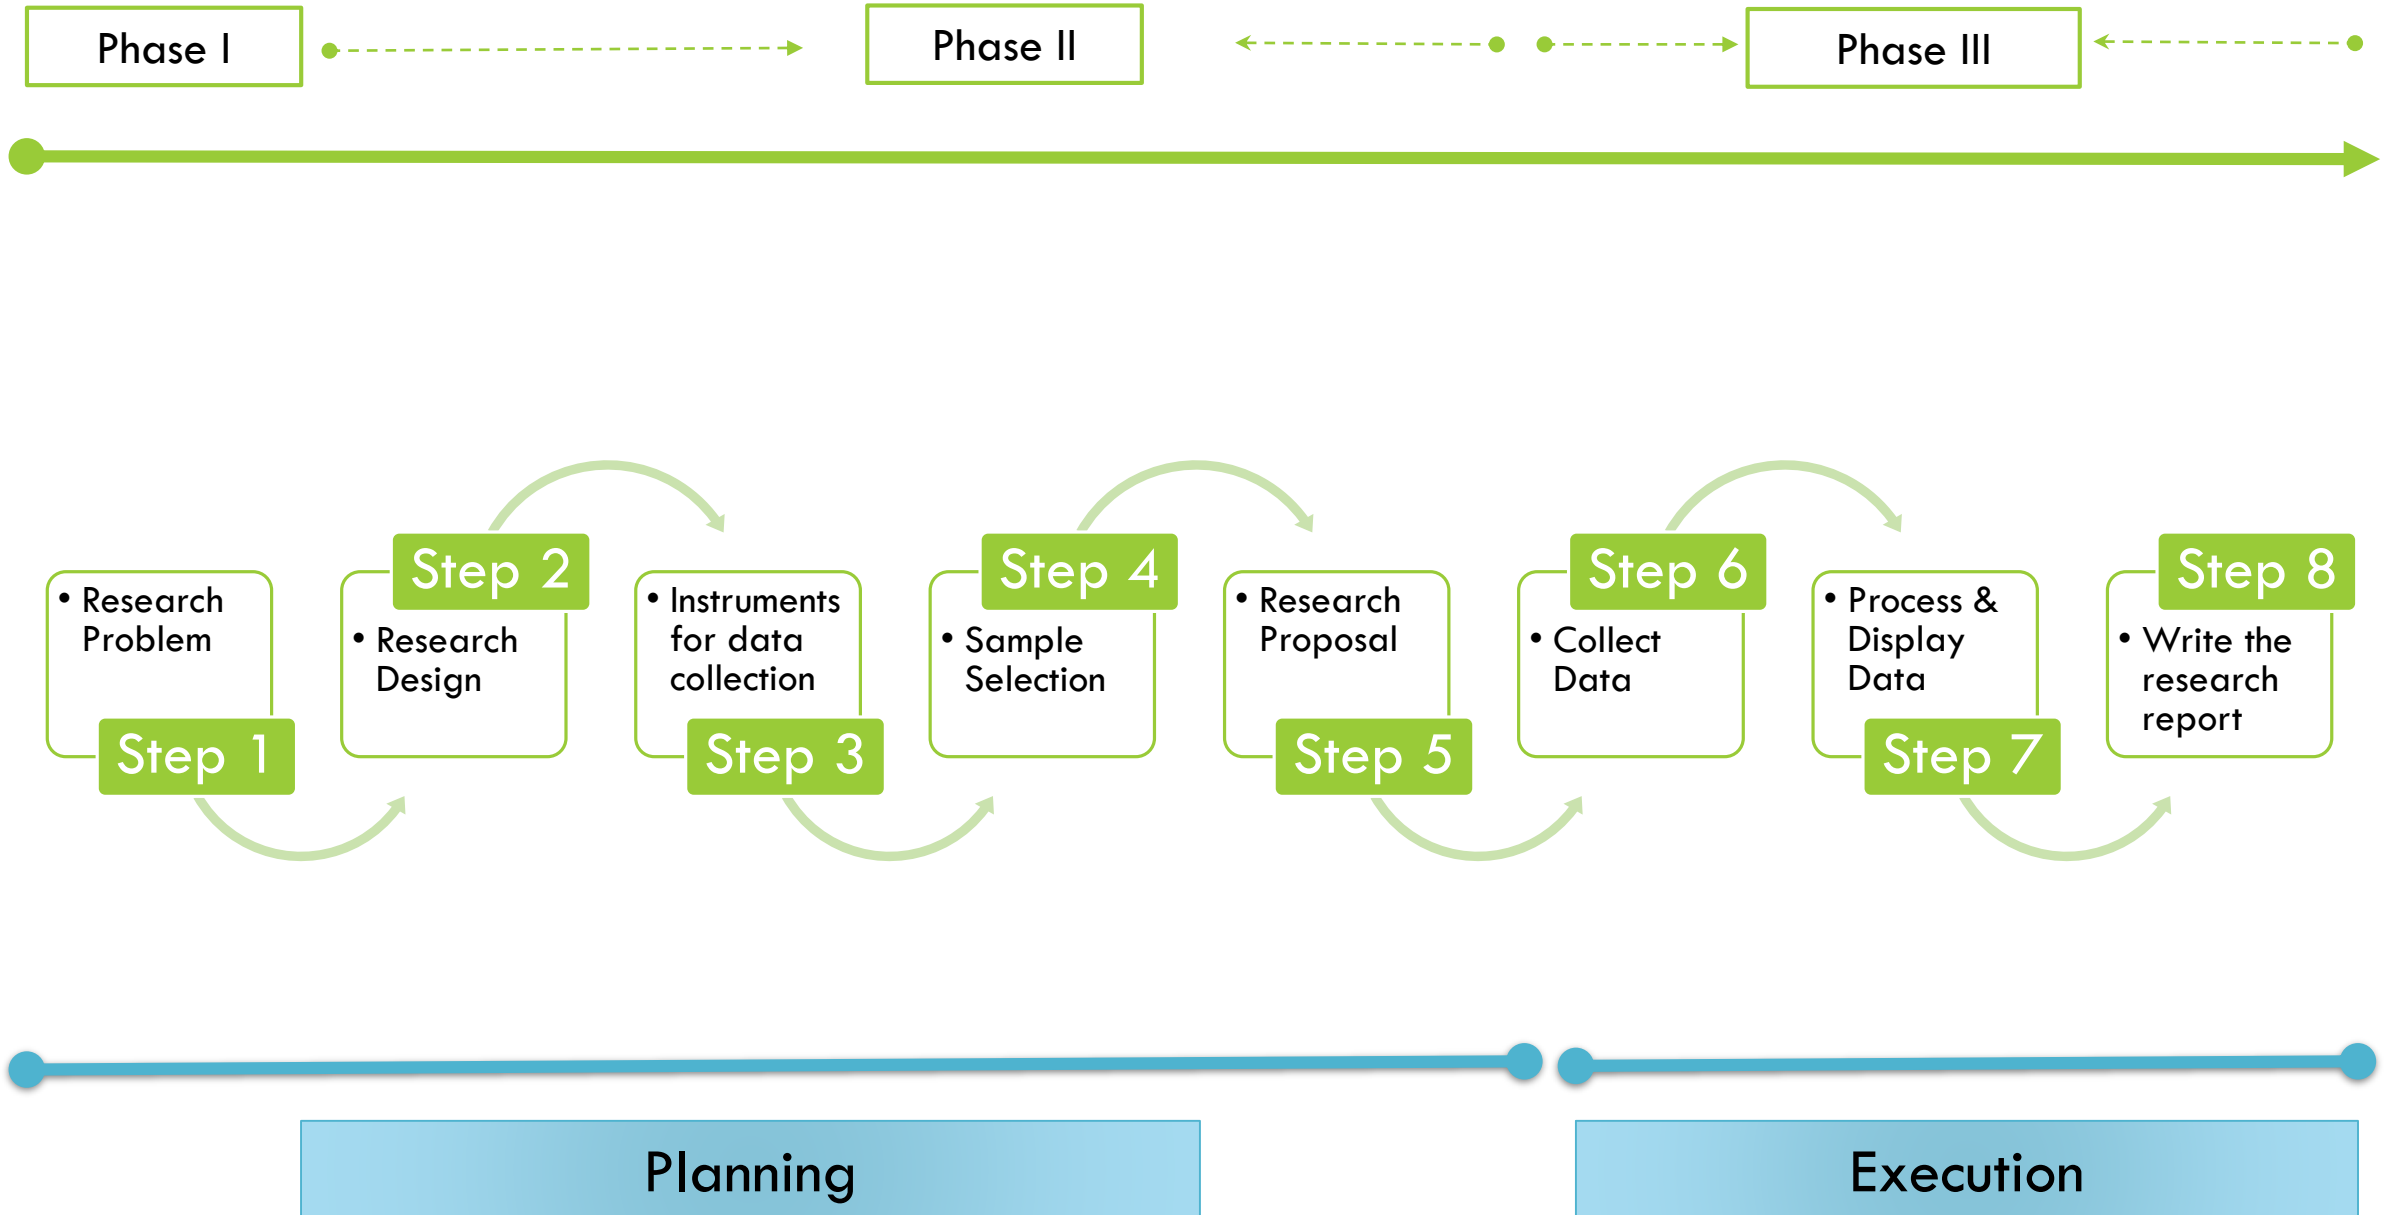

Figure 2.3 The chapters in the book in relation to the operational steps

Figure 2.3, Ranjit Kumar, *Research Methodology*

ACTIVITY TWO — THE RESEARCH PROCESS

- using your notes and/or readings
- provide/construct a detailed list of all the activities that need to be undertaken for each of the STEPS in the RESEARCH PROCESS model designed by Kumar (2011)

NEXT WEEK

- ACTIVE READ OF
 - Booth et al – The ethics of research
 - Kumar – Chapter 14 – Considering Ethical issues in data collection
- Make notes or answer the following questions
 - how do the different authors define or describe research ethics?
 - why is research ethics or ethical behaviour as a research important?
 - Kumar describes the stakeholder in research. Who are they?
 - What ethical issues should considered when thinking about
 - PARTICIPANTS
 - RESEARCHER
