

```
1
2 //Loops are programming structures which allows programs to repeat code or processes
multiple times
3 //For Loops are one of For types of Loop structures in JavaScript
4 //The syntax for a loop structure is:
5     //for(initialize; condition; counter){    }
6
7
8 //Given the HTML and JavaScript below, complete the code by using a for loop to
process the arrays as follows:
9     //Check if the mark is greater or equal to 50, then assign a "Pass next to the
student name
10    //Else, assign a "Fail" message next to the student name
11 //The Expected Output is shown on the next page.
