

APPLICATIONS DEVELOPMENT PRACTICE 3 (ADP372S)
JUNE ASSESSMENT 2022 RUBRIC

Group no.: 10

Final Mark: 67 %

Group Members:

Burgess, Davids, Dollie, Feni, Matsaba, Petersen

SECTION A: MODEL (total points: 84)	Country	City	Address	Name	Student	Student_ Address	Employee	Employee_ Address
Key: Poor-0; Satisfactory-1; Very Good-2								
Domain	1	1	1	2	2	2	2	1
Factory	2	2	1	2	2	2	2	1
TestFactory	1	1	2	2	1	1	1	1
Repository	1	2	X	X	2	2	2	2
Service (General)	1	2	X	X	2	2	2	2
TestService (General)	2	2	X	X	2	1	2	1
Controller (General)	X	X	X	X	X	X	X	X
TestController (General)	X	X	X	X	X	X	X	X
SECTION B: SPECIFIC SERVICES (total points: 24)								
Key: Very Poor-0; Poor-1; Fair-2; Average-3; Good-4; Very Good-5; Excellent-6								
Specific Service Q5(get employee by email). + TestService + Controller + TestController								3
Specific Service Q6(get emp names by cityId). + TestService + API + TestAPI + Controller + TestController								0
Specific Service Q7(get cities by countryId). + TestService + Controller + TestController								2
Specific Service Q8(get student lastnames by countryId). + TestService + API + TestAPI + Controller + TestController								0
SECTION C: SETUP (total points: 24)								
Key: Not at all satisfied-0; Slightly satisfied-1; Moderately satisfied-2; Very satisfied-3; Completed satisfied-4								
Maven project, pom setup on IntelliJ, etc.								4
GitHub Collaboration – Milestones and Issues actioned timeously								3
Evidence of fair work distribution amongst team members on Github.com								3
MySQL setup and Application.yaml file								4
Facade Design implementation Q6. & Q8.								0
Evidence of Reflection in the Readme.md file								1

Total Points: 88/132

Special Conditions:

1. Student(s) not participating in the group assessment will be awarded 0%.
2. Student(s) not contributing adequately to the group assessment may be penalised.
3. Evidence of group work and collaboration that is evenly distributed must be clearly shown on Github.com so the team members are awarded the same mark. Team members may be requested to answer questions posed about their contribution.
4. Student(s) committing any form of plagiarism may be awarded 0%.

Lecturer Comments:

1. Not all team members in sync with team lead. Team member hasn't submitted correct Github link.
2. Constructors should be private (Country Entity)
3. Problems created by @ManyToOne relationships and @JoinColumn missing in City Entity, but also constructors in Country should be private which shows up as errors in setting country in City domain.
4. CountryFactoryTest test data makes no sense for countryId.
5. postalCode should be int in Address, so AddressFactory and test affected
6. Poor Name test data in EmployeeFactoryTest
7. This is bad practice / misunderstand GenericHelper

```
(GenericHelper.addressIsNullorEmpty(address))
```

8. Why

```
public interface IRepository <T,ID> {
```

9. In the service package, incorrect use of impl sub package?
10. Poor test data for some service tests
11. Employee details not retrieved in ControllerTest and displayed
