

Product development from an IT failures perspective

How the customer explained it

How the project leader understood it

How the business consultant described it

How the analyst designed it

How the programmer wrote it

How the project was documented

How they advertised the open source version

How they applied open source patches

What the beta testers received

What marketing advertised

What operations installed

How it was supported

What the customer really needed

How it performed under load

The disaster recovery plan

How the customer was billed
