

Yes i would
to book table
for two

Good day sir can I assist
with anything

**kitchen receive order on the screen and begin preparing the meal,
chef also alert waiter to fetch the complete order**

waiter enters the table order into the
computer, the order is sent to the
kitchen

**waiter delivers order to the table. Order timer stop and save
prepare time to system**

Customer leave the restaurant and the waiter marks the table as dirty on the system
