

SUBJECT: PROJECT PRESENTATION III PRP370S [Application Development] PRP371S [Communication Networks] PRP372S [Multimedia Applications]	START DATE: 1 May 2022 OPEN UNTIL: 30 May 2022	DURATION: 4 weeks	TOTAL MARKS: 100
---	---	---------------------------------	--------------------------------

**DEPARTMENT OF INFORMATION TECHNOLOGY
FACULTY OF INFORMATICS AND DESIGN (FID)**

DPICTA: DIPLOMA IN INFORMATION AND COMMUNICATION TECHNOLOGY: APPLICATIONS DEVELOPMENT
DPICTC: DIPLOMA IN INFORMATION AND COMMUNICATION TECHNOLOGY: COMMUNICATION NETWORKS
DPICTM: DIPLOMA IN INFORMATION AND COMMUNICATION TECHNOLOGY: MULTIMEDIA

EXAMINER: P. INDERLAL
MODERATOR: D. LAKAY
EXTERNAL MODERATOR: DR S. THAKUR

You are allowed enough time and proper preparation for the assessment. Any assessment missed by a student must be accommodated by a doctor's letter which will be verified by the admin staff.

GENERAL INSTRUCTIONS

- Answer all the questions.
- All answers must be typed out or selected unless otherwise stated by your lecturer.
- Adobe is the preferred Scanner App or use the app that comes with your device.
- All Cape Peninsula University of Technology (CPUT) assessment rules and regulations are still valid on plagiarism.
- Ensure enough data available for the assessment.

SPECIAL INSTRUCTIONS

Please carefully read and comply with the following rules/instructions which differ from a physical assessment on campus.

CONDUCTING AN ASSESSMENT AS A STUDENT

All work done for this assessment must be done solely by the registered student for this subject.

This is an individual assessment and requires no group work.

The student is prohibited from contacting any person using any device or technique that may compromise your individual work when taking this assessment.

Any material (directly) copied from any resources on your PC or the Internet will not be accepted unless the text is properly referenced according to Harvard referencing.

DRAWINGS

When making any drawings, please use Microsoft Word or Microsoft Visio. Ensure that any annotations or labels are done clearly and legible. Use Adobe scanner to scan in any drawings and upload them as PDF. Use a proper A4 paper with lines unless you can ensure neatness.

If the examiner cannot read your answer, it will be ignored.

Should the assessment require any uploads please label your uploads as follows:

Subject-Code-Surname-Studentnumber e.g. PRP37XS-Rothman-123456789

CONCLUSION OF YOUR ASSESSMENT:

Always keep a copy of an assignment you are working on if the lecturer requires that. Do not tamper with that copy so the timestamp of the document will be proof of your submission. Any such assignments with an incorrect timestamp may result in a zero mark. Any Blackboard assessments will record your activity, but always ensure that the assessment was saved/uploaded/submitted.

ASSESSMENT PREPARATION BEFORE ENGAGING IN AN ASSESSMENT:

- Please do a thorough pre-preparation of whatever will be required, such as continuous power feed to your device and a fully charged device.
- Test your connections i.e. fixed-line or Wi-Fi with sufficient reception.
- Ensure you check your municipal updates on any power outages and avoid working during the power outages in your area.
- Ensure you have sufficient bandwidth.
- Ensure you are in a quiet location before attempting the assessment.

REQUIREMENTS

- Working device to allow you to answer the assessment as perfectly as can be.
- A reliable Internet connection and data/bandwidth to allow for the duration of the assessment.

Portfolio of Evidence Brief

Elements of an e-portfolio

Higher education researchers recommend the inclusion of four broad steps when creating e-portfolios:

1. **Collect** – collecting, saving, and organizing artefacts from programs of study, courses, and individual learning experiences
2. **Select** – using a critical framework to choose the artefacts that best serve as evidence of learning and development
3. **Reflect** – reflecting, in a structured way, on how the evidence that has been selected demonstrates an evolution in learning
4. **Connect** – identifying points of connection across the artefacts and reflections for the purpose of creating a polished summary

Evidence in e-portfolios

It is important to determine, in advance, what kinds of evidence are appropriate to include in an e-portfolio. An artefact is a text-based work or multimedia product that constitutes evidence of learning.

Some examples of artefacts that could be included in an e-portfolio are:

- Videos of presentations
- Audio recordings
- Writing assignments
- Artefacts of group projects
- PowerPoints
- Photographs
- Websites and/or links to web content
- Schedules, timelines, and/or goals
- Illustrations or concept maps

The learner must also be able to explain the artefacts and substantiate their claims that learning has occurred.

Creating e-portfolios

There are some common, widely used elements within e-portfolio approaches:

- Compiling of the portfolio.
 - The learner chooses what to integrate within their portfolio, and to make claims about why that evidence is important.
- Reflection is evident.
 - The reflection should tie the elements of the portfolio together into a coherent whole.

INSTRUCTIONS:

- Create an e-Portfolio using the Blackboard Portfolio tool.
- Kindly refer to the assessment rubric on Blackboard for a detailed breakdown of what should be included in your portfolio.
- Upload the link for the Portfolio on the Blackboard submission link.

Total Marks: 100
