THUR	Today we met as the Graduate recruitment team with our WIL coordinator. She introduced the Project we would be working on and ran us through the project plan for the graduate recruitment project. She also stated that we would have to design a flow diagram for the process of the paper-based system and how we would initially automate that whole process.					
FRI	Today we met with our WIL coordinator together with the Graduate Recruitment Portal client. She ran us the the steps she takes to process the applications of graduates and how the process goes about. She also indicated that the graduates send her an email with their CV, and she confirms. Then some information is captured on an excel spreadsheet and some information is kept on paper. This is then updated every three months.
