

DEPARTMENT OF INFORMATION TECHNOLOGY						
WEEK	FROM	[15/08/2022]			TO	[19/08/2022]
MON	On this day, there wasn't any work done related to the Graduates Recruitment Portal Project					
TUES	On this day, we had a meeting with the group on Google Teams in the evening. The meeting was based on the Dataflow diagram and the project plan. We presented our diagrams and everyone presented theirs and why they think theirs are good enough to be chosen as a diagram we are going to present on Friday to the client.					
	The meeting ended, not everyone was present so we could not make a final decision with 11 people. I then started a voting pole in our WhatsApp Group so that people choose the diagram they think is more or less the same as the process described by the client.					
WED	On this day, there wasn't any work done related to the Graduates Recruitment Portal Project					
THUR	On this day, there wasn't any work done related to the Graduates Recruitment Portal Project.					
FRI	On this day, we had a meeting with the client Mrs. Abrahams. I presented the Data Flow Diagram the students voted for which was my diagram. Though there was a misunderstanding about the type of diagram we were supposed to make and present. We were supposed to present a manual process DFD (data flow diagram).					
	Thanks to keeping the diagram abstract at level 0 of detail, the process was more or less the same with slight differences which did not ruin the presentation.					
	The meeting was a bit disorganized at the beginning, not to mention that we went silent on the client which was very rude of us. We got scolded, which is acceptable					
	I hope next time we do better and that Mrs. Abrahams forgives our incompetency today.					
SELF-EVALUATION		RATINGS (tick the relevant box)				Student's reflection
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	
	1	2	3	4	5	
Communication Skill		X				I need to work on gathering enough courage to jump in and talk when needed instead of waiting on someone else to do so. This led to us being rude towards Mrs. Abrahams because no one had the courage to come forward and simply respond.
Problem Solving Skills				X		Our meeting on Tuesday took too long and we ended up not making a decision which became a problem because the meeting did not serve its entire purpose of having a Diagram chosen that will represent the team. I solved the problem by running a voting pole in the Group chat because everyone seems to be active there but sadly, they do not attend meetings. We finally got feedback and we made progress on the matter.
Decision Making Skills			X			
Teamwork Skills			X			Teamwork is somewhat lacking in our Group. People are not participating, only 8 were present today out of everyone. This happened again on our meeting Tuesday, we only had 11 people present. There is supposed to be 32 of us. If people have urgent errands, it is

						understandable, with that at-least we should be having around 20 – 25 people present.
Technical Skills			X
