

Graduate Recruitment Portal Project

Meeting with client regarding functional requirements

Transcript

- In the meeting the client said the current system she is currently using is to upload the resumes is manually operated using Excel and she would like for it to be automated.
- The client described that the graduate recruitment portal that we are developing is for graduates who recently graduated and have not found jobs yet.
- The graduates who qualify to upload their resumes in the portal are from 2019 till 2022 since finding employment was very hard in pre and post COVID-19.
- The functional requirements are as follows.
- A graduate must have a valid id and email address.
- A graduate must enter their personal details to the portal: First name, Last name, Gender, Qualification, Contact Detail, Drivers Licence, Nationality and Academic Transcript
- A graduate will receive an email to upload their resume every 3 months because the system admin must update the system to remove graduates who have found jobs.
- The resumes must be ordered and catalogued by Qualification e.g. ICT Resumes, Business Admin Resumes
