TUES	On Tuesday morning, I continued working on the capstone project for ADP. My goal today was to implement the Login system for the application. I implemented the login functionality in the Spring Boot API. I then switched to the front-end application to wire things up so that the two applications can communicate with each other when a user attempts to log in.				
	In the afternoon, I reviewed some code in GitHub since I was the group leader for ADP this year. I then helped those who needed help fixing the issues that came up during the code-reviewing session.				
WED	On this day in the morning, I started helping one of my teammates with his front end which was not complete and has errors.				
	The task went on for the whole day and we didn't manage to finish fixing his component.				
THUR	On this day, we went to campus to present the project.				
FRI	On this day I began studying for the upcoming test on Monday the 31 st of October.				

MENTOR EVALUATION	RATINGS (tick the relevant box)					STUDENT REFLECTION	
EMPLOYABILITY SKILLS	Requires Improvement	Inconsistent	Marginal	Competent	Excellent	EMPLOYABILITY SKILLS
